CONSTRUCTION ON THE TEN-ACRE BUILDING for Thomasville Furniture Industries plant located in the Town of Appomattox is at this time fifty per cent complete. Work is moving along so fast that by the time you see this picture, the wall on the high storage Building shown above will be up and most of the second wing (to the right of the storage room) will be enclosed. The first wing of the building just left of the high storage room is near completion and workers are in the process of installing equipment in that wing.

Two-hundred construction workers are employed at the TF1 plant site at this time. Ground has been broken and work is set to begin on the 100 foot X 100 foot office building that will be located just left of the high storage room shown above and we are told that in just a few days you will see the walls going up on that building.

According to a spokesman for English Construction Company of Altavista, contractors for the Thomasville Furniture Industries plant, October 1, 1974 is the scheduled date for completion of the plant but they hope to be ahead of schedule before that time. English actually began construction August 5, 1973, and weather conditions have not been good for construction work but should improve at this time of the year.

Future Land Use Plan Alternative C, known as the Greenspace Plan, was adopted by the Central Virginia Planning District Commission (CVPDC) at its February 28th meeting.

The Plan, which offers guidelines to accomodate future growth and development, must be approved by a majority of the local jurisdictions before it becomes the Official Plan of the District.

The CVPC is made up of the Counties of Amherst, Appomattox, Bedford and Campbell and the Cities of Bedford and Lynchburg.

The CVPC's Physical Development Policy Committee recommended Alternative C to the Commission after they reviewed testimony from the public hearing held last October.

If Appomattox County adopts the Greenspace Plan it will encourage growth and development around areas already designated growth centers, such as the town of Appomattox.

This form should be brought to school on the day of registration if the examination has been completed by the family physician. Clinics will be sponsored by the Appomattox County Health Department for those children who do not visit a private physician.

Those parents who do not wish for their child to receive the smallpox vaccination are required to bring a statement from their physician stating that he does not consider the smallpox vaccination necessary. Children entering school for the first time must have the following immunizations: Diphteria, Tetanus, Whooping Cough, Poliomyelitis, Measles, and Rubella.

## Appomattox Native Wins $4,000 B&W Suggestion Award

LYNCHBURG, March 1 - An employee of the Naval Nuclear Fuel Division of Babcock & Wilcox in Lynchburg has been awarded more than 14,000 for a suggestion.

C. Wade Rogers, a son of Mr. and Mrs. B. C. Rogers of Rt. 4, Appomattox, was recently presented a check for $4,068 by Dr. J. F. Ewing, division vice president. The award was the largest ever presented in the history of the division's suggestion program.

Roger's suggestion involved a new system for the destructive evaluation of components which would improve production yields.

Neil B. George, suggestion system coordinator, said Rogers' idea resulted in a first - year savings to the company of more than $20,500. The company recently reported that division employees received nearly $10,000 in suggestion awards during 1973.

Dr. Ewing, in presenting the record award to Rogers, said, "A continuing flow of ideas like this is tremendously important to a manufacturer. In today's market, it is such creative and innovative thinking that helps us maintain a competitive edge."

He and his wife, the former Linda Mayhew, have two daughters and live at 522 Atlanta Ave., Lynchburg.
